

Generating Cycle and Controlling Sequences

**Generating Cycle
= Yin Process =
mother-child sequence**

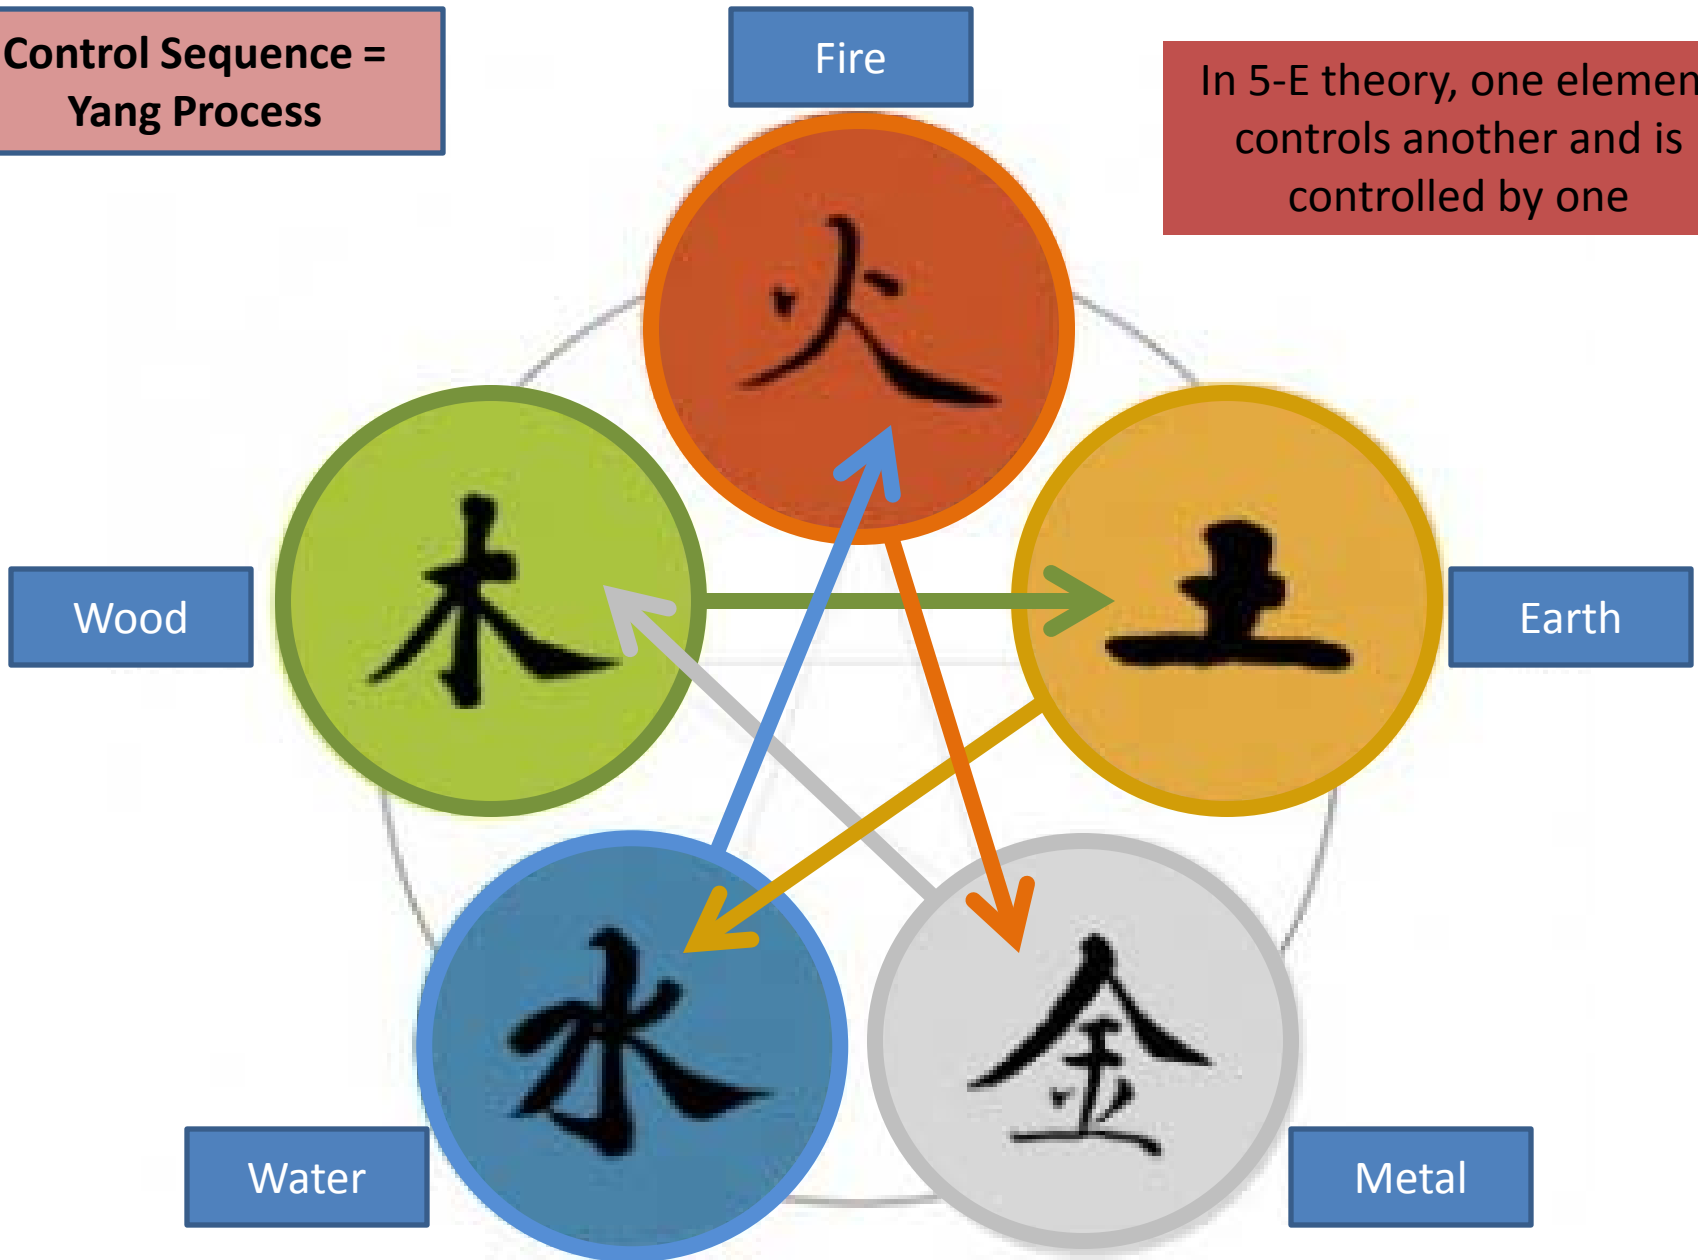

**In 5-E theory, one
element generates
another and is
generated by one**

Control Sequence =
Yang Process

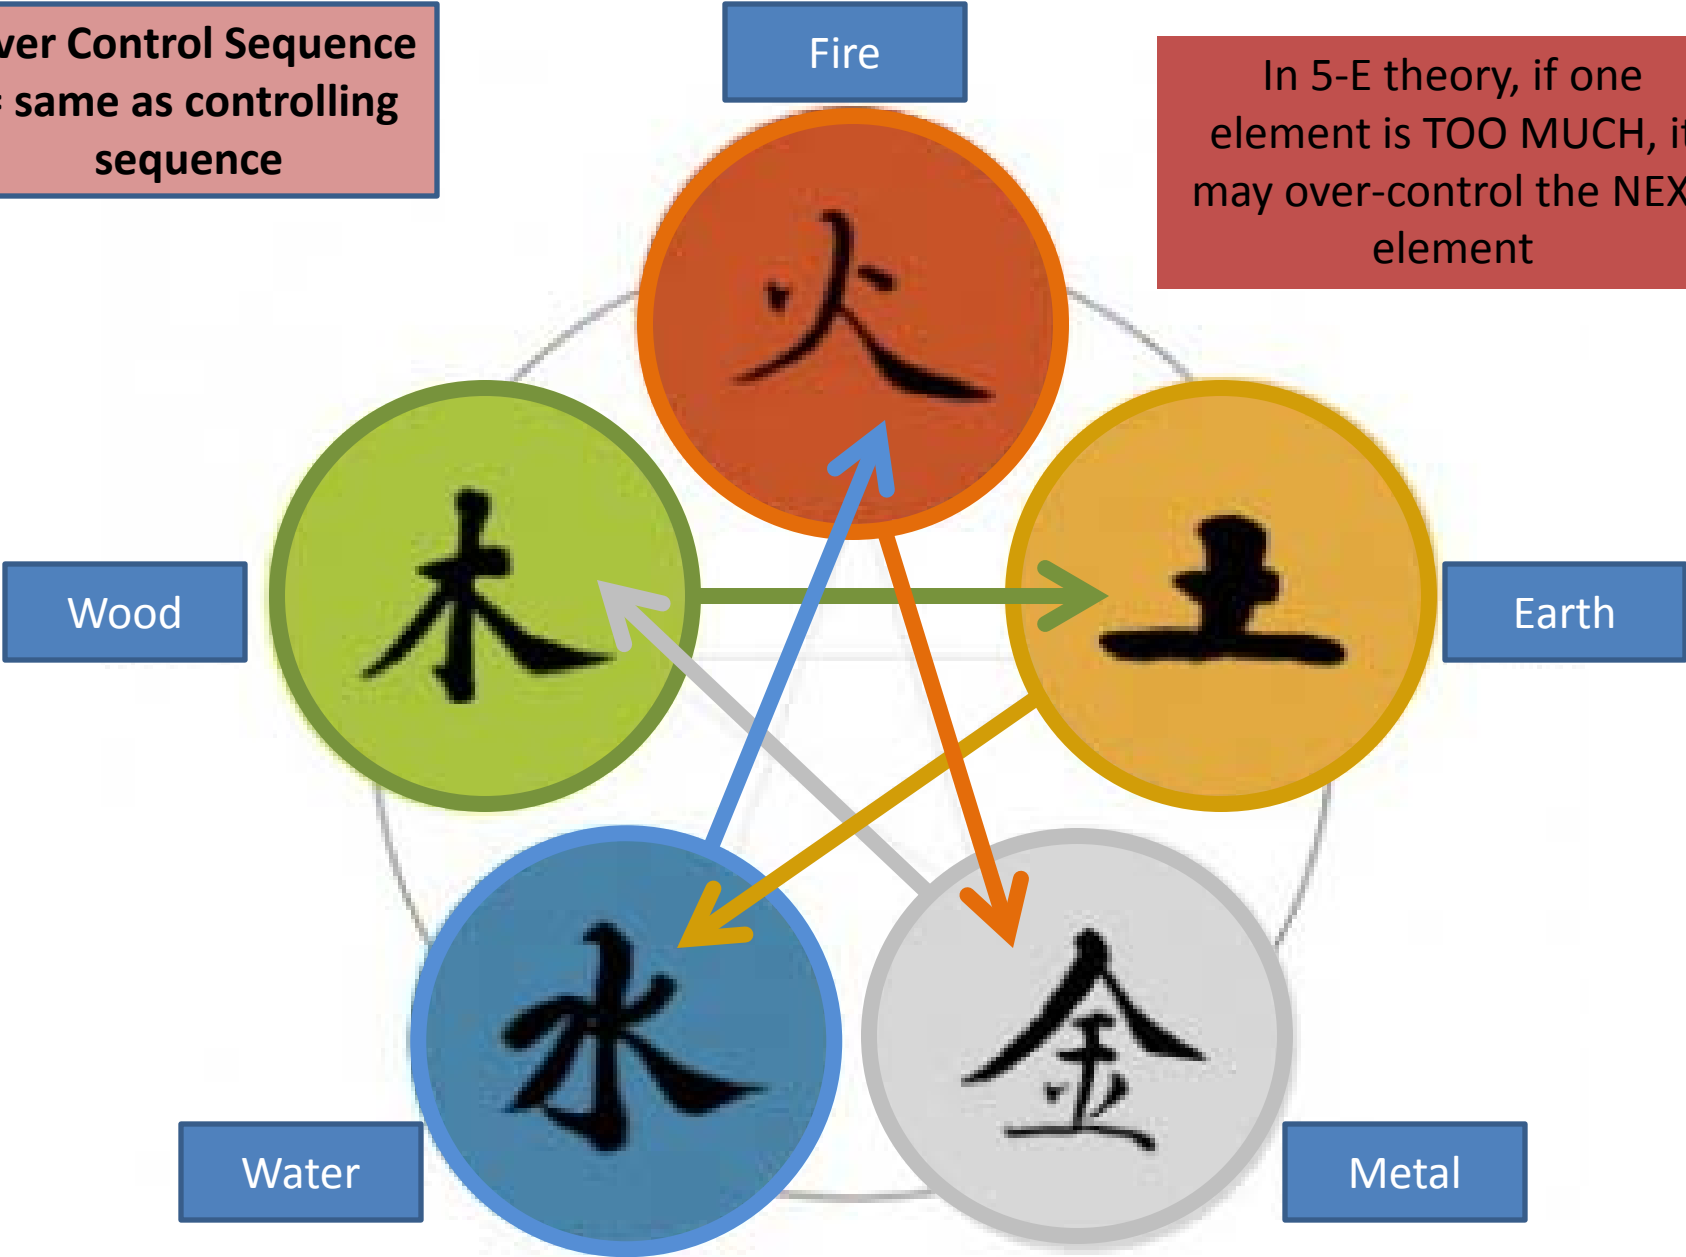

Fire

In 5-E theory, one element
controls another and is
controlled by one

Over Control Sequence
= same as controlling
sequence

In 5-E theory, if one
element is TOO MUCH,
it may over-control the NEXT
element

Counter Control
Sequence = reverse of
controlling sequence =
INSULTING

Fire

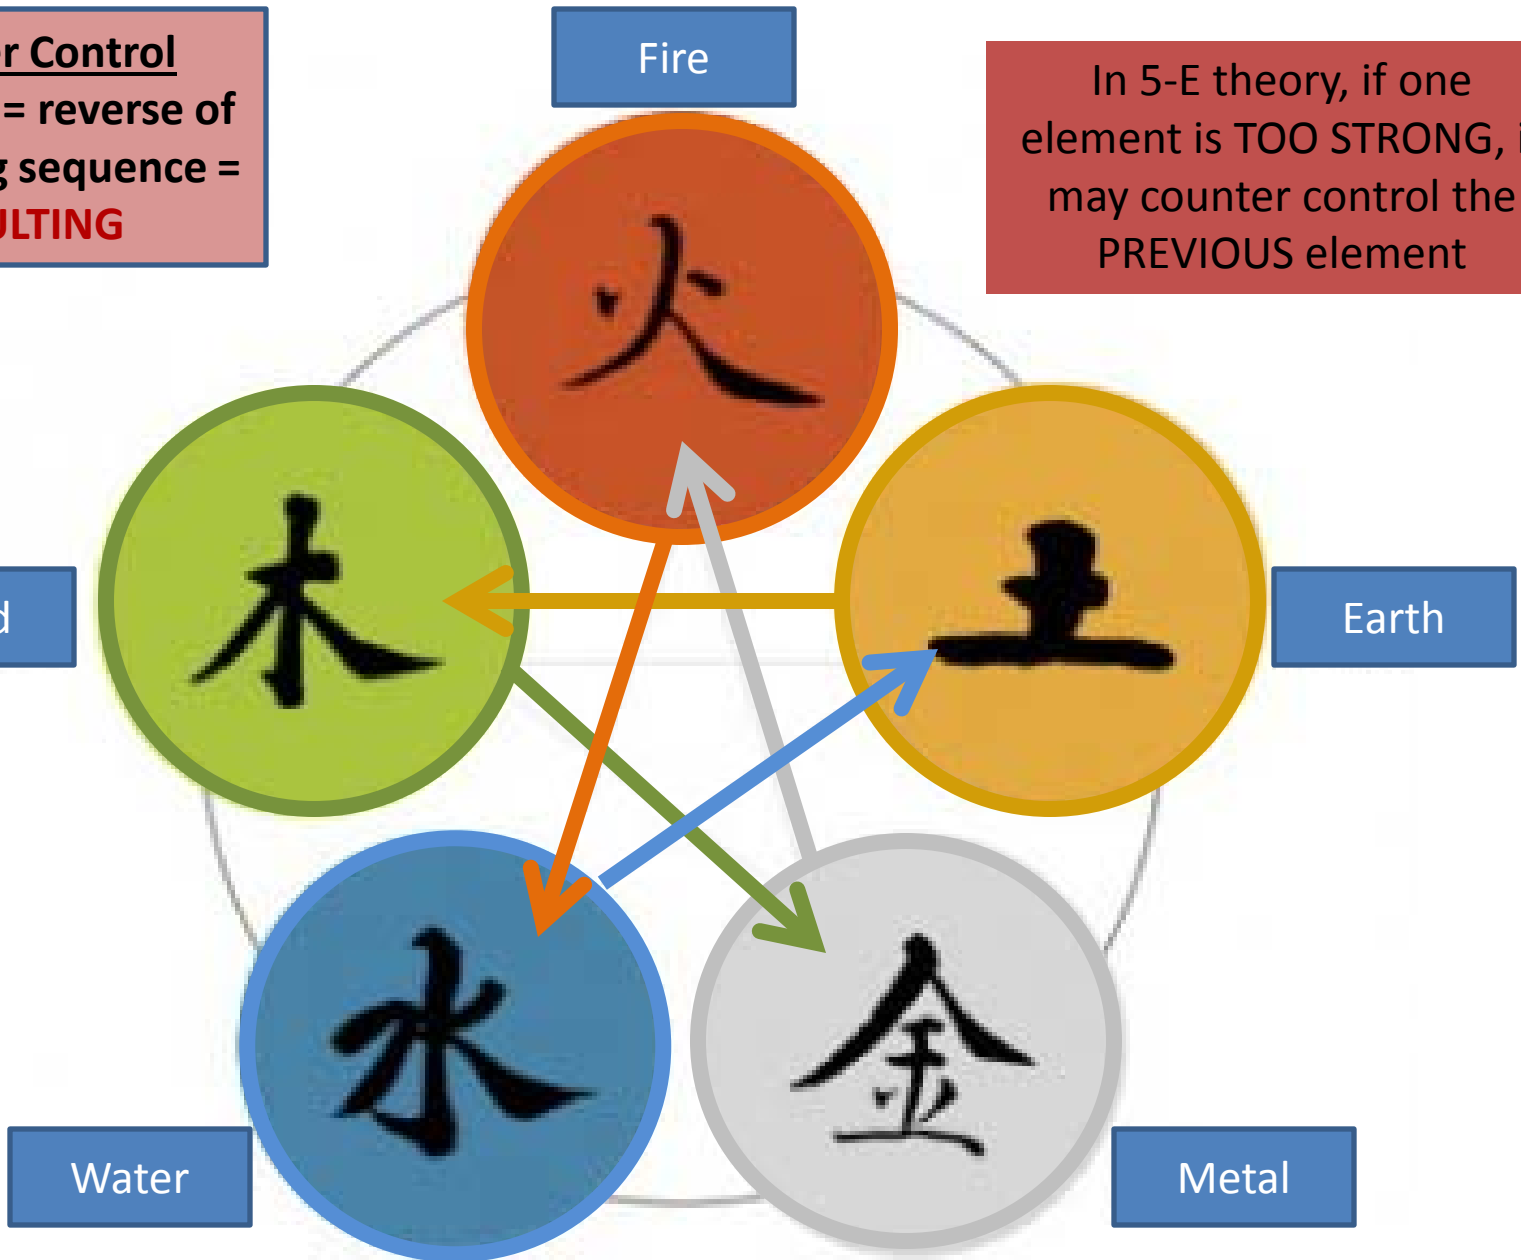

In 5-E theory, if one
element is TOO STRONG,
it may counter control the
PREVIOUS element

Wood

Earth

Water

Metal

Physiological and Pathological Cycles and Sequences

Physiological
relationships of organs
= Generating Sequence

Heart

火

Liver

木

Spleen

土

Kidney

水

Lung

金

Physiological
relationships of organs
= Control Sequence

heart

火

liver

木

spleen

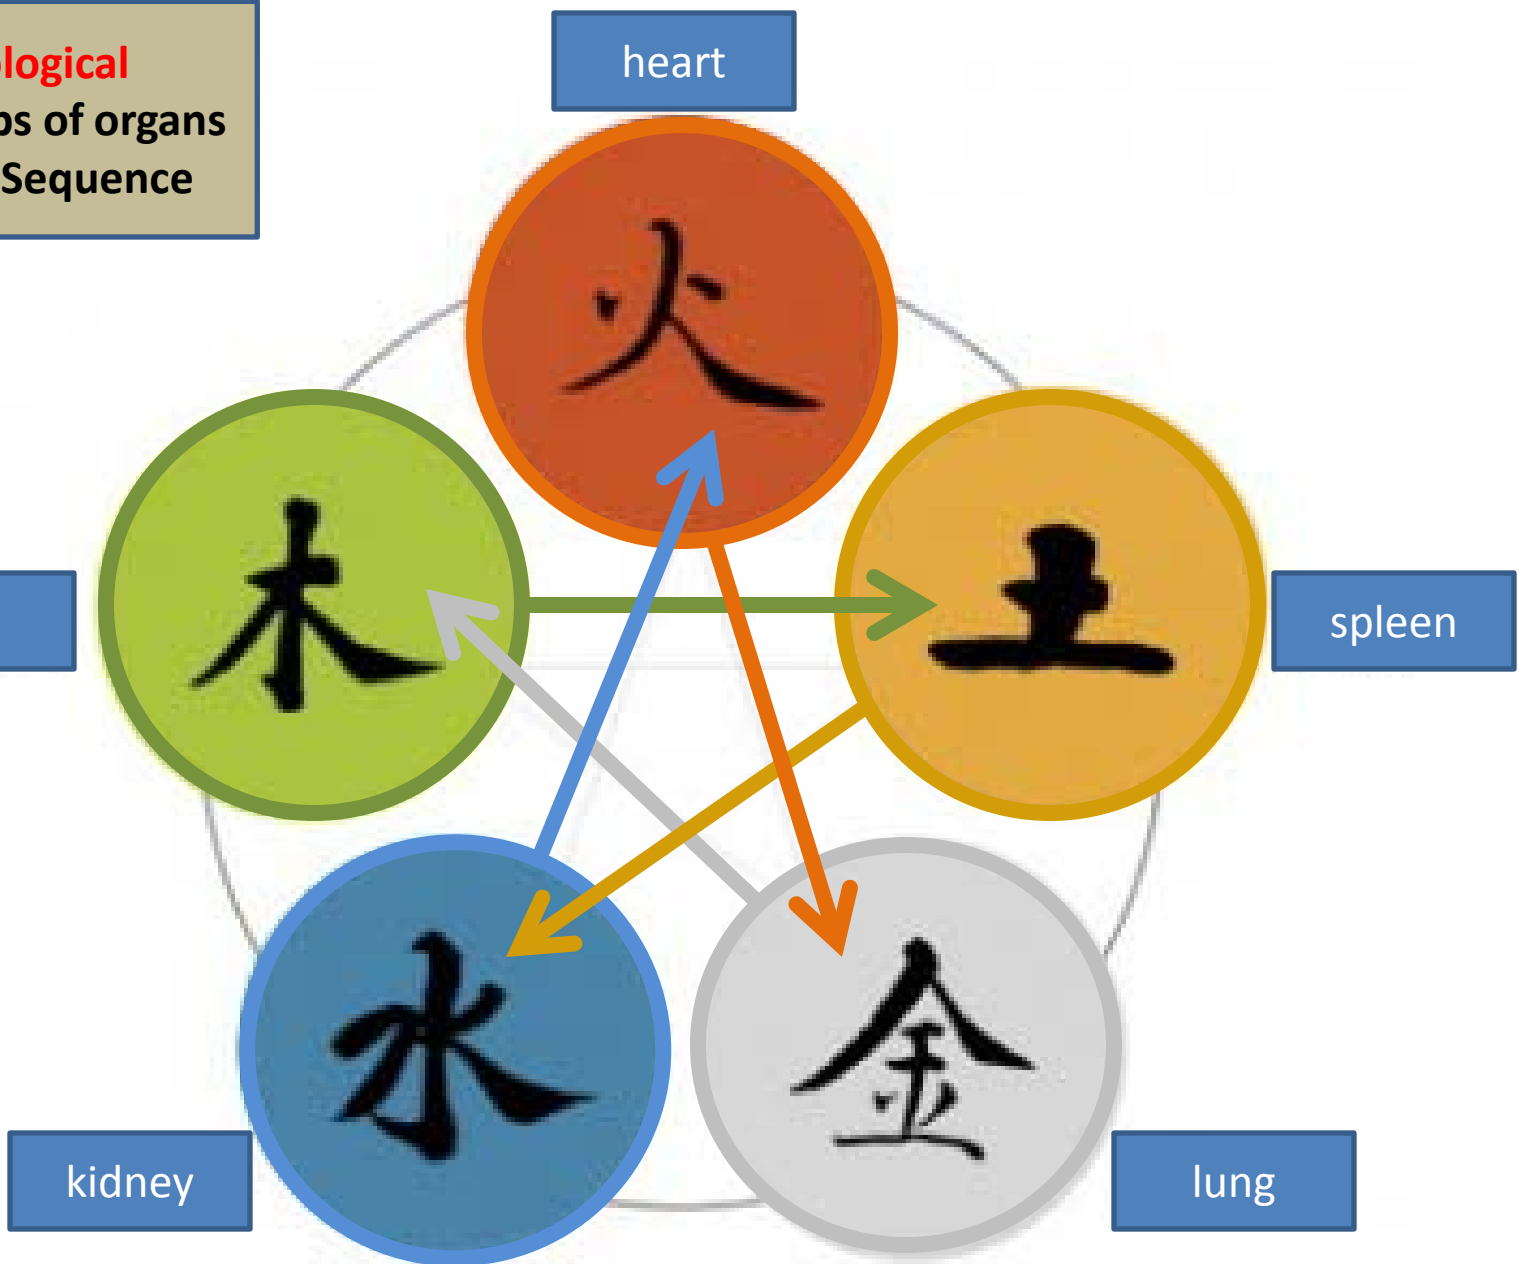

土

kidney

水

lung

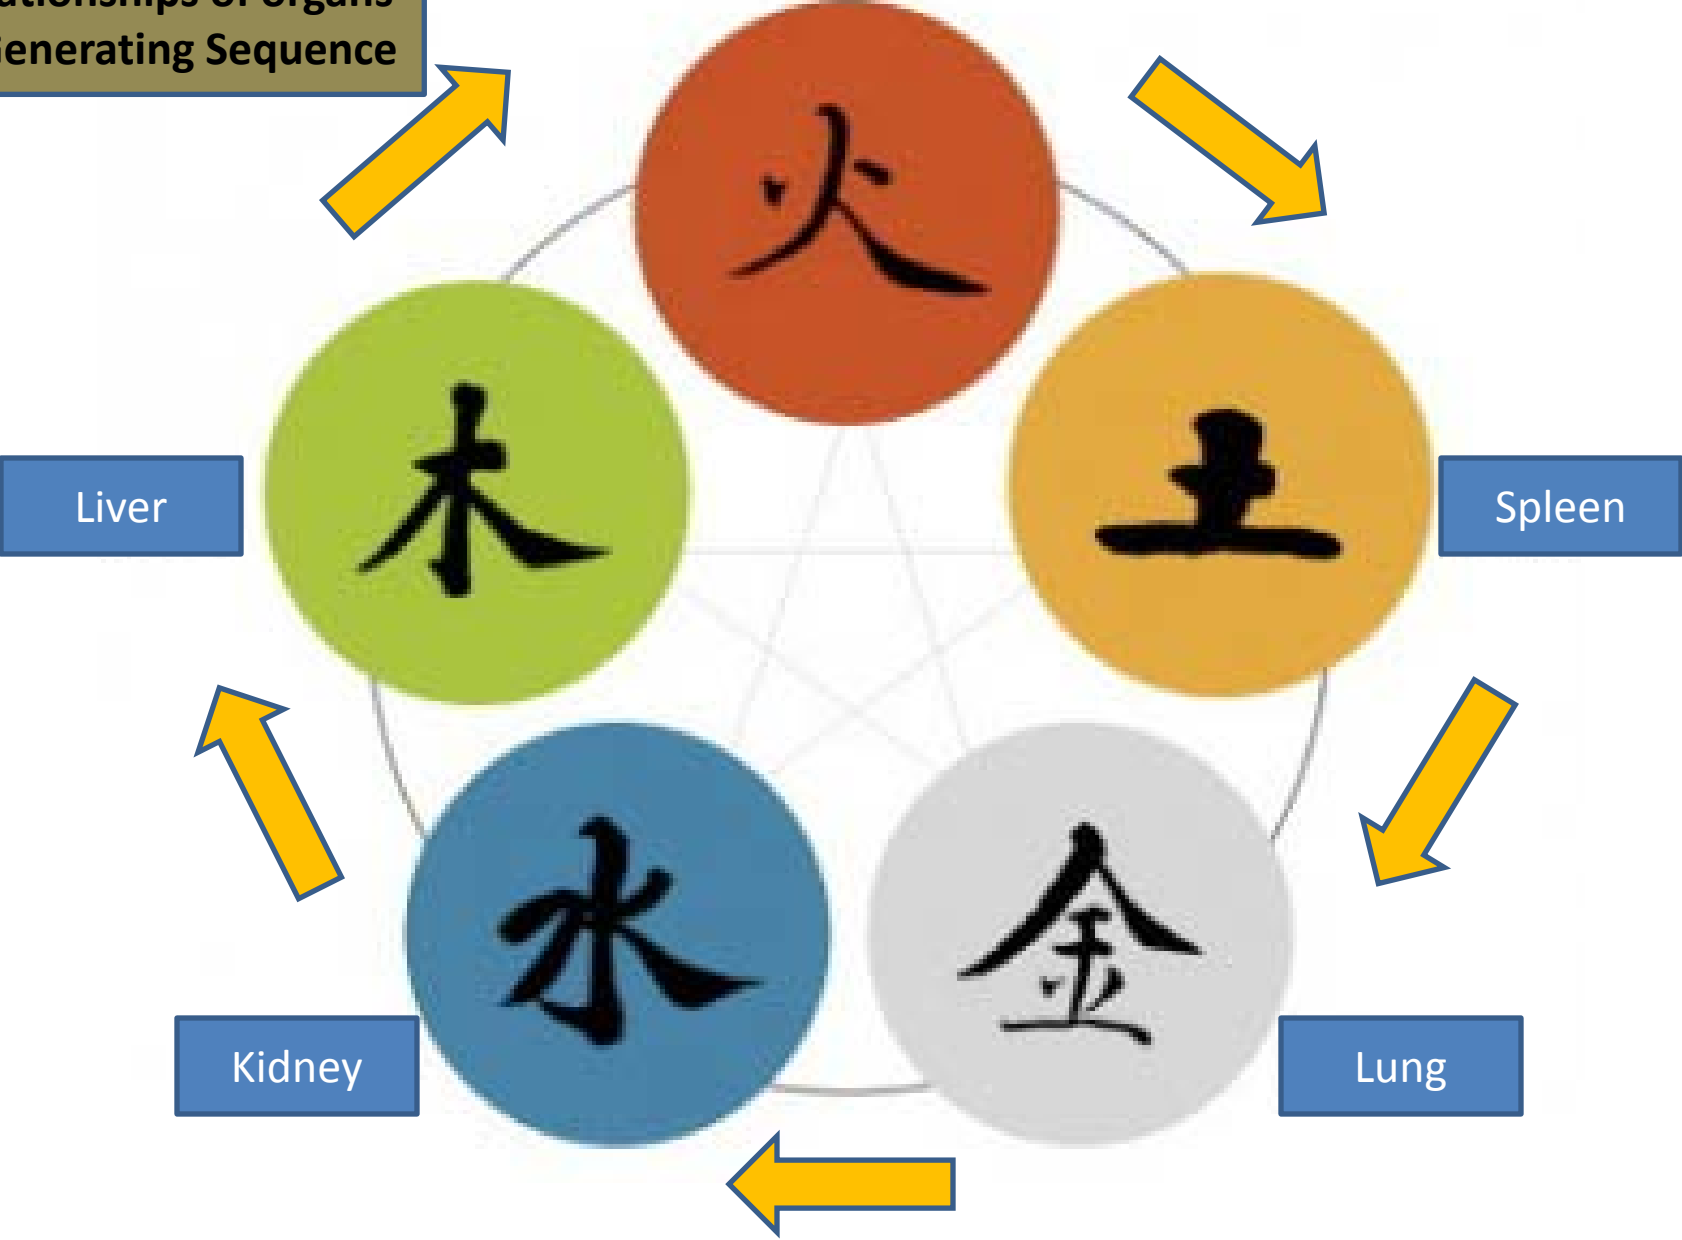

金

Pathological
relationships of organs
= Generating Sequence

Heart

a) Mother affects child

Pathological
relationships of organs
= **Generating Sequence**

Heart

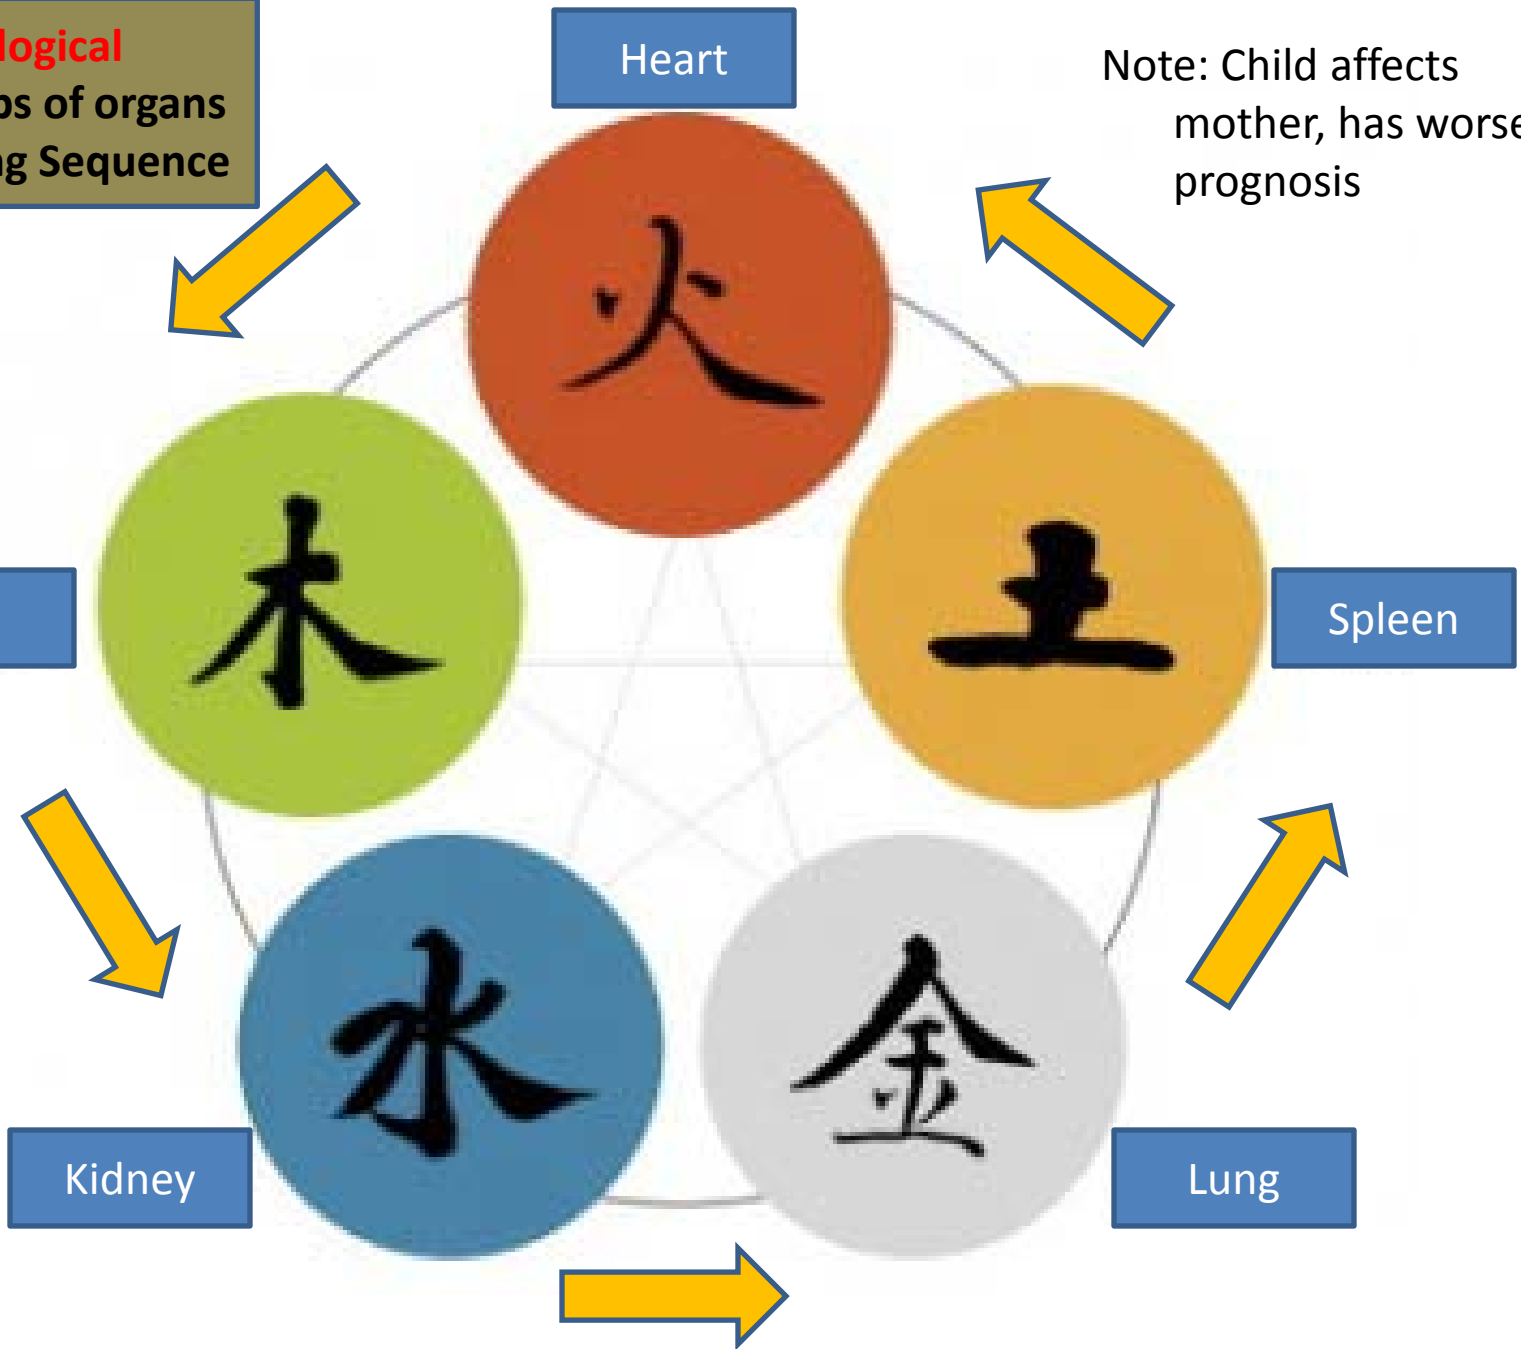

Note: Child affects
mother, has worse
prognosis

Liver

Spleen

Kidney

Lung

Pathological
relationships of organs
= Over Controlling
Sequence

Heart

Liver

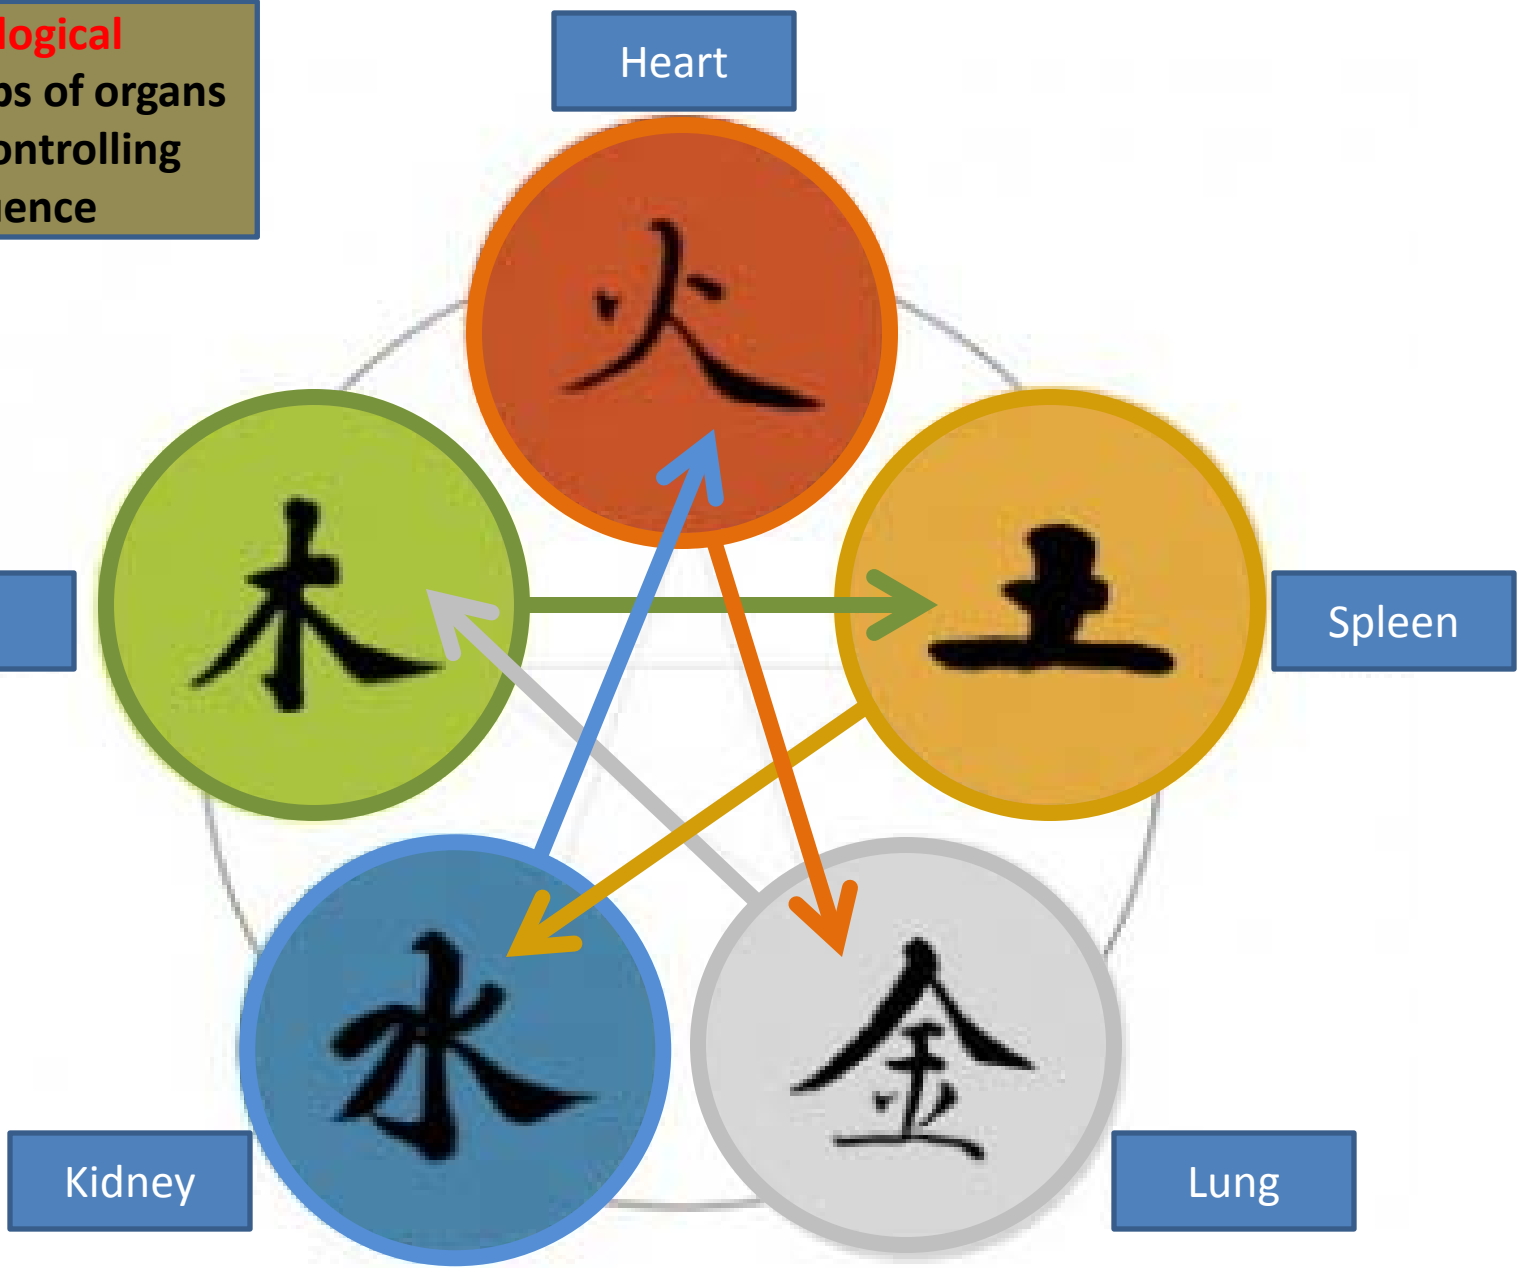

Spleen

Kidney

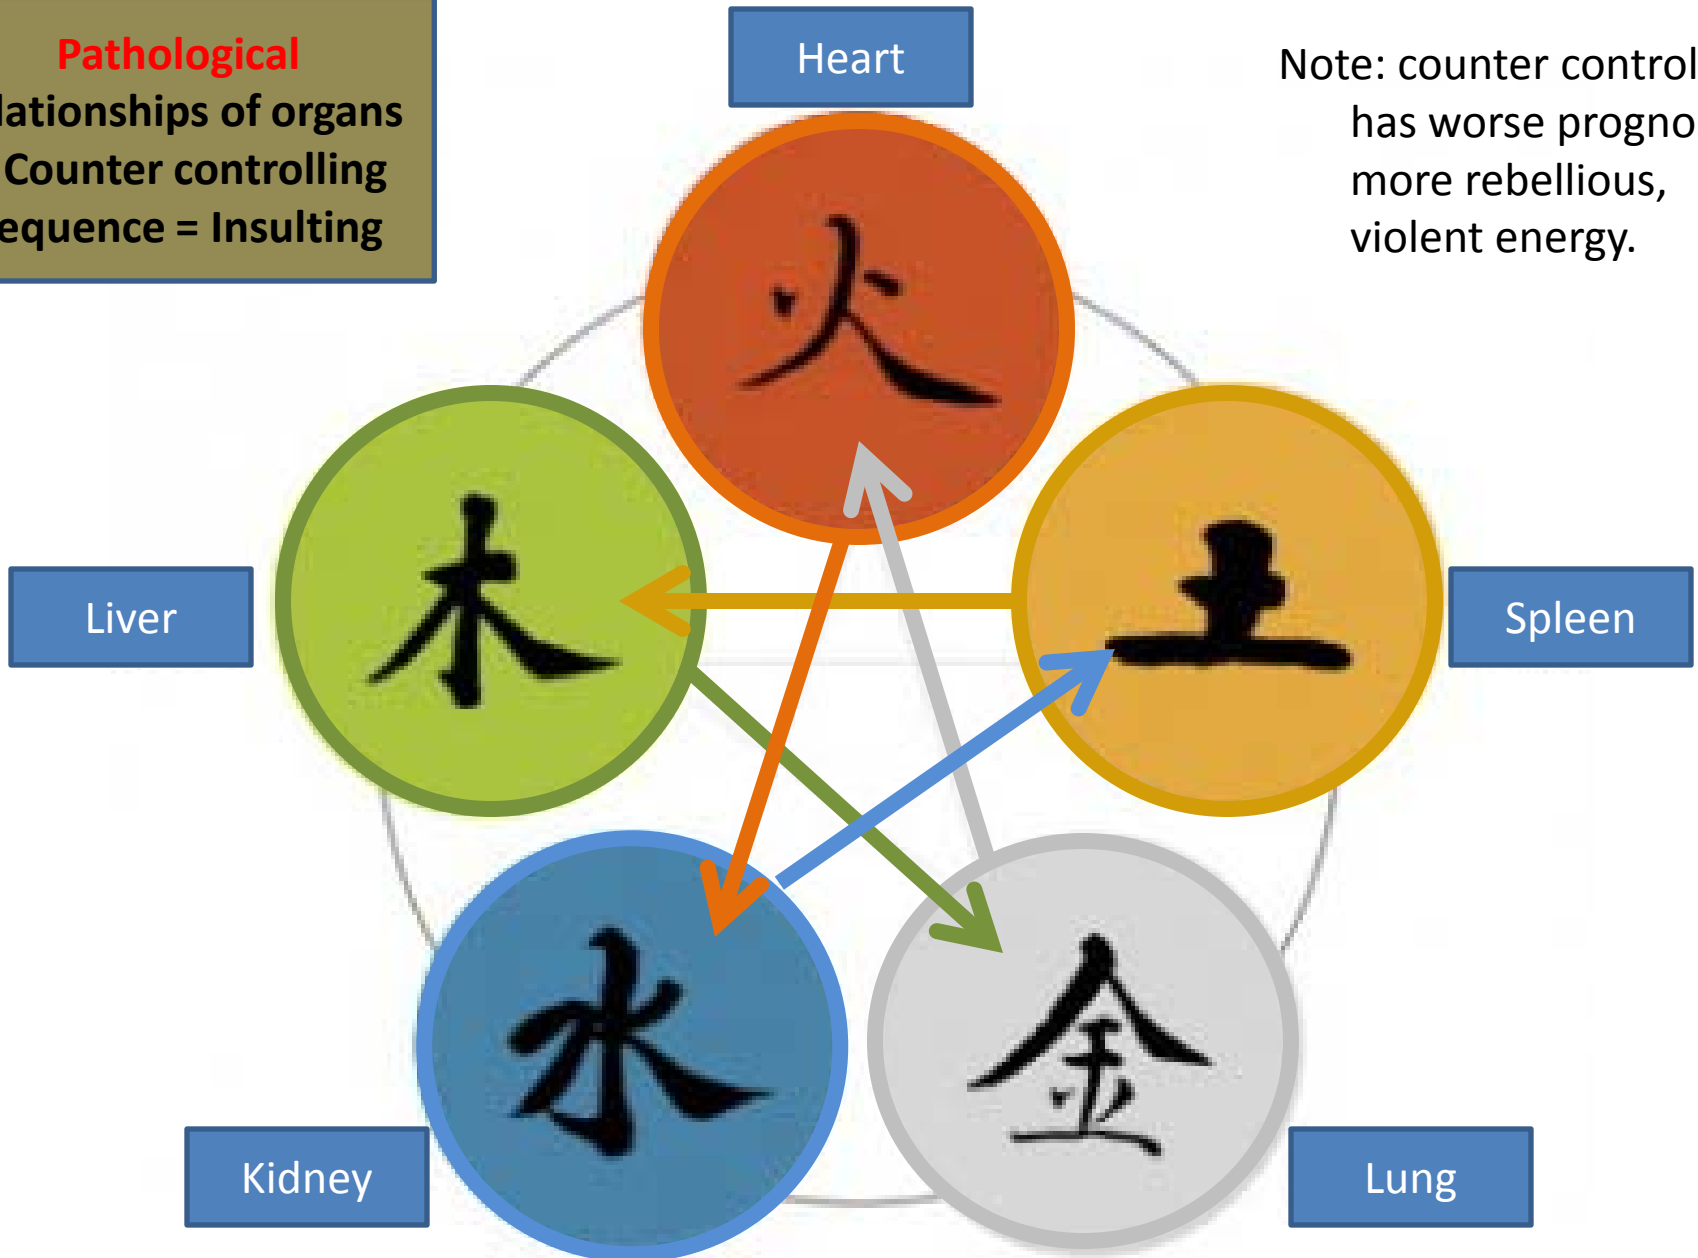

Lung

Pathological
relationships of organs
= Counter controlling
Sequence = Insulting

Heart

Note: counter control
has worse prognosis,
more rebellious,
violent energy.

Liver

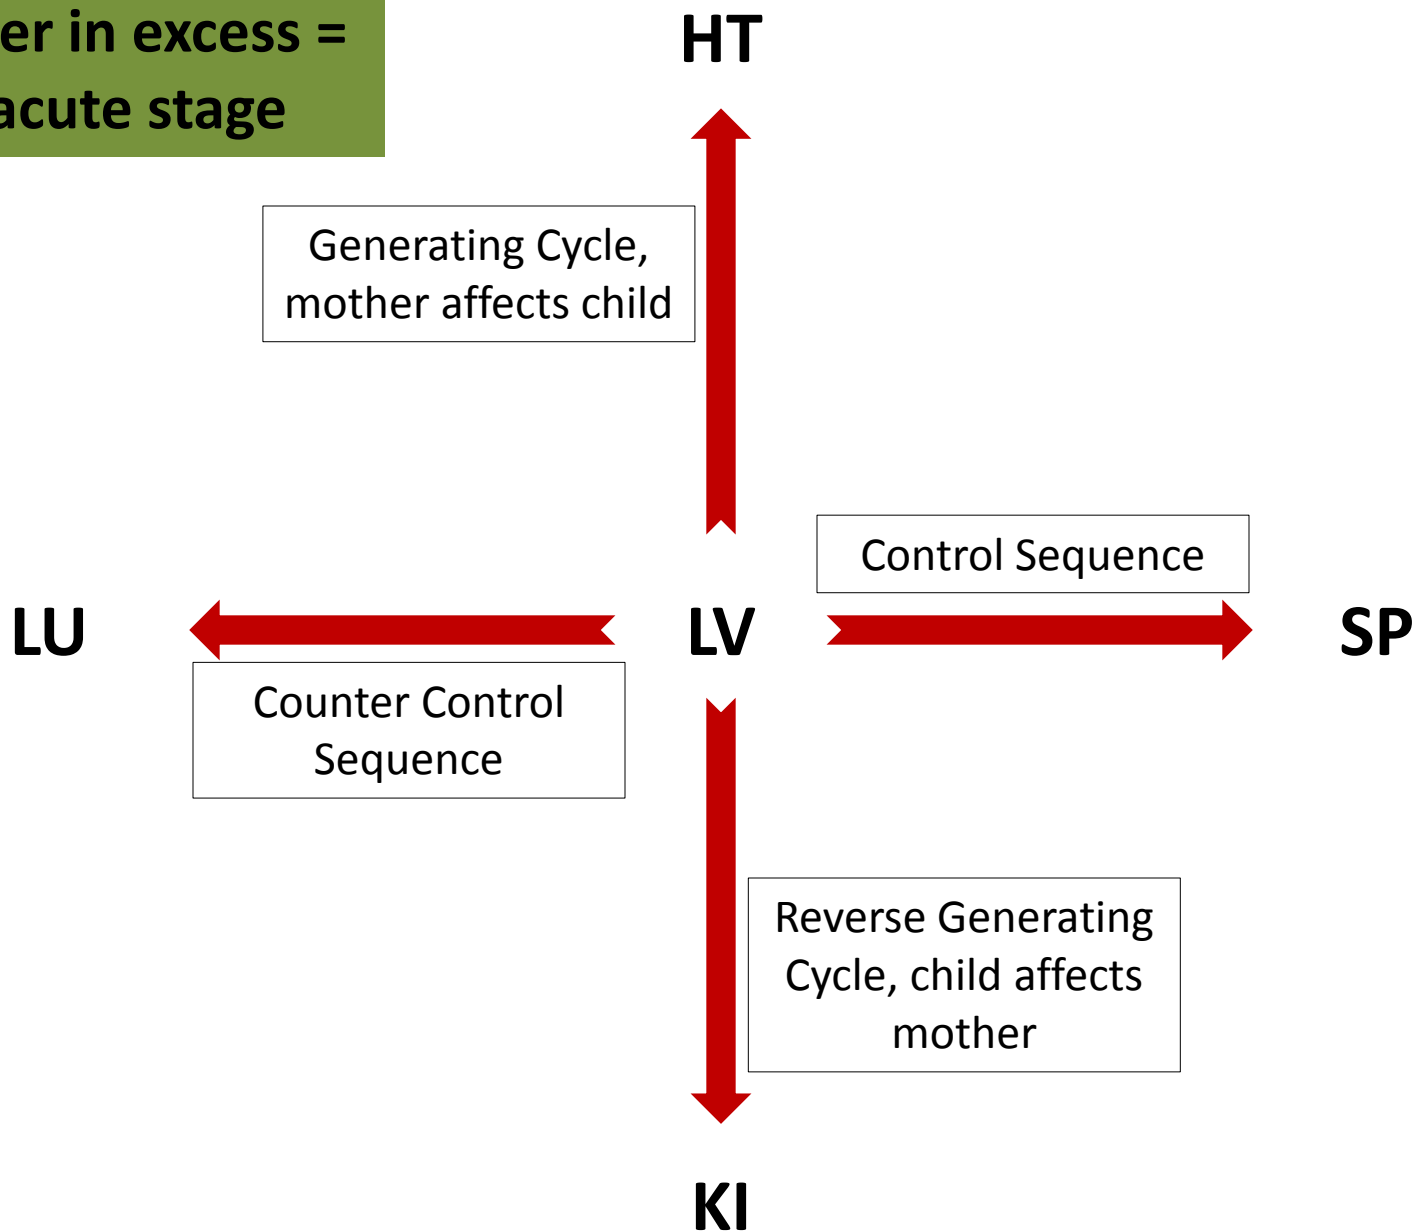

Spleen

Kidney

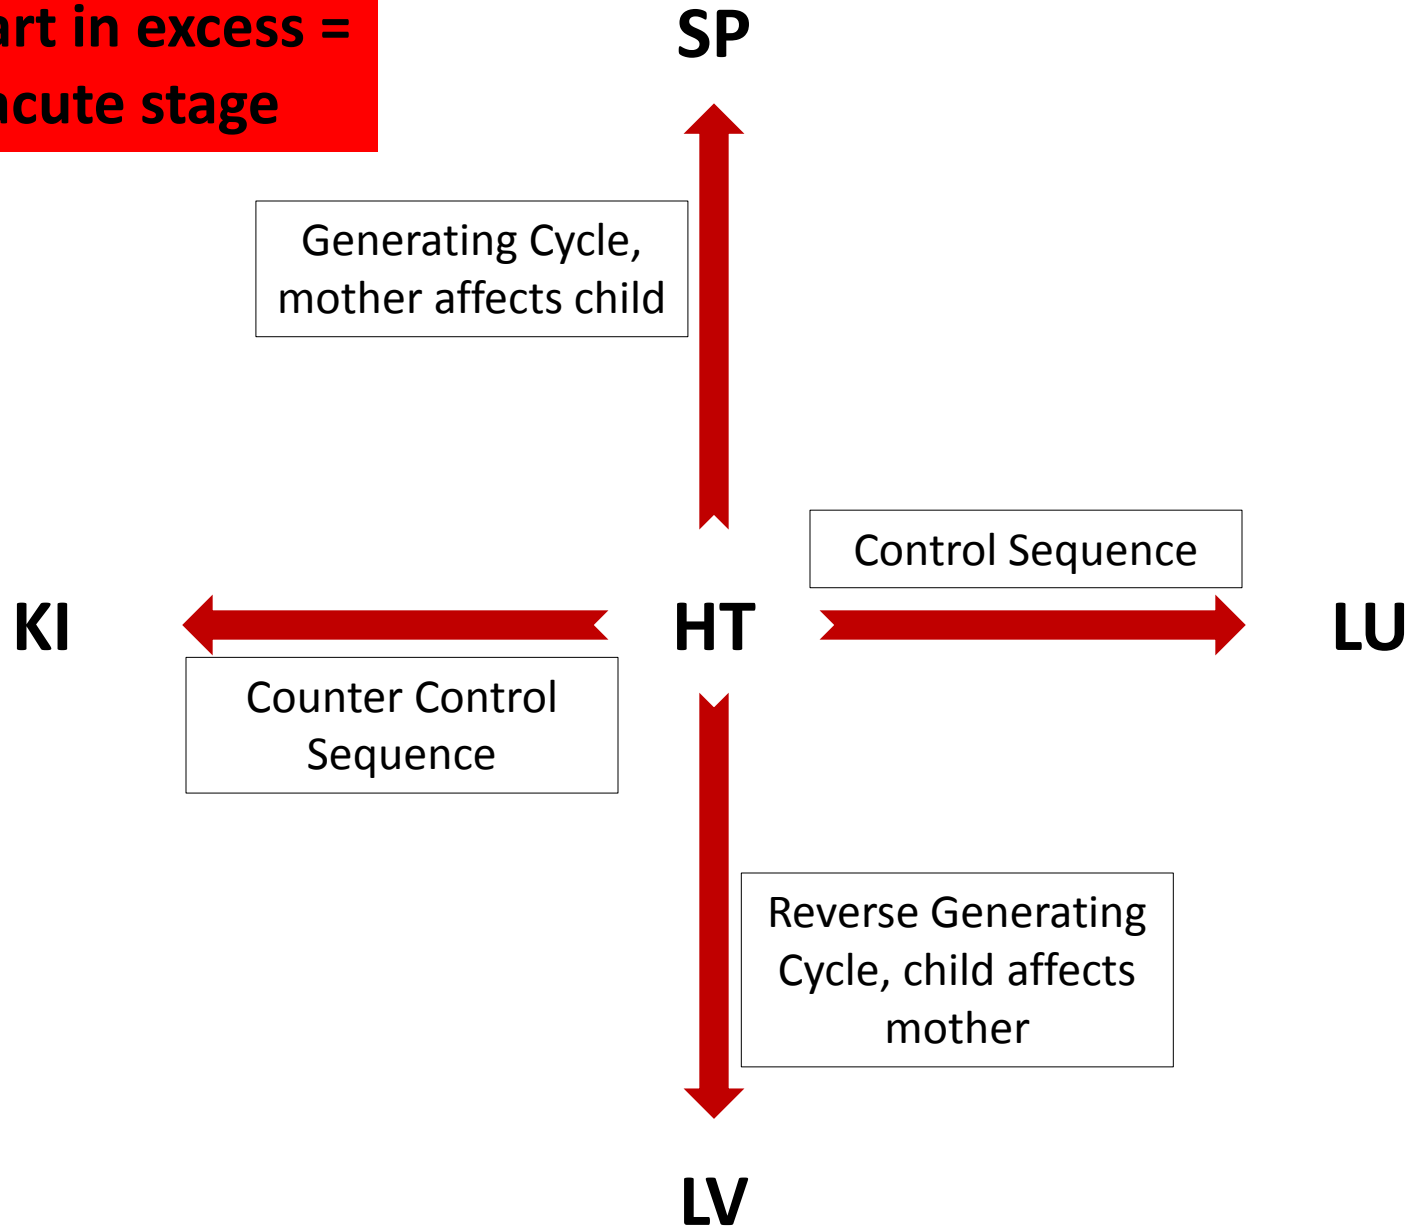

Lung

5 Element Pathology

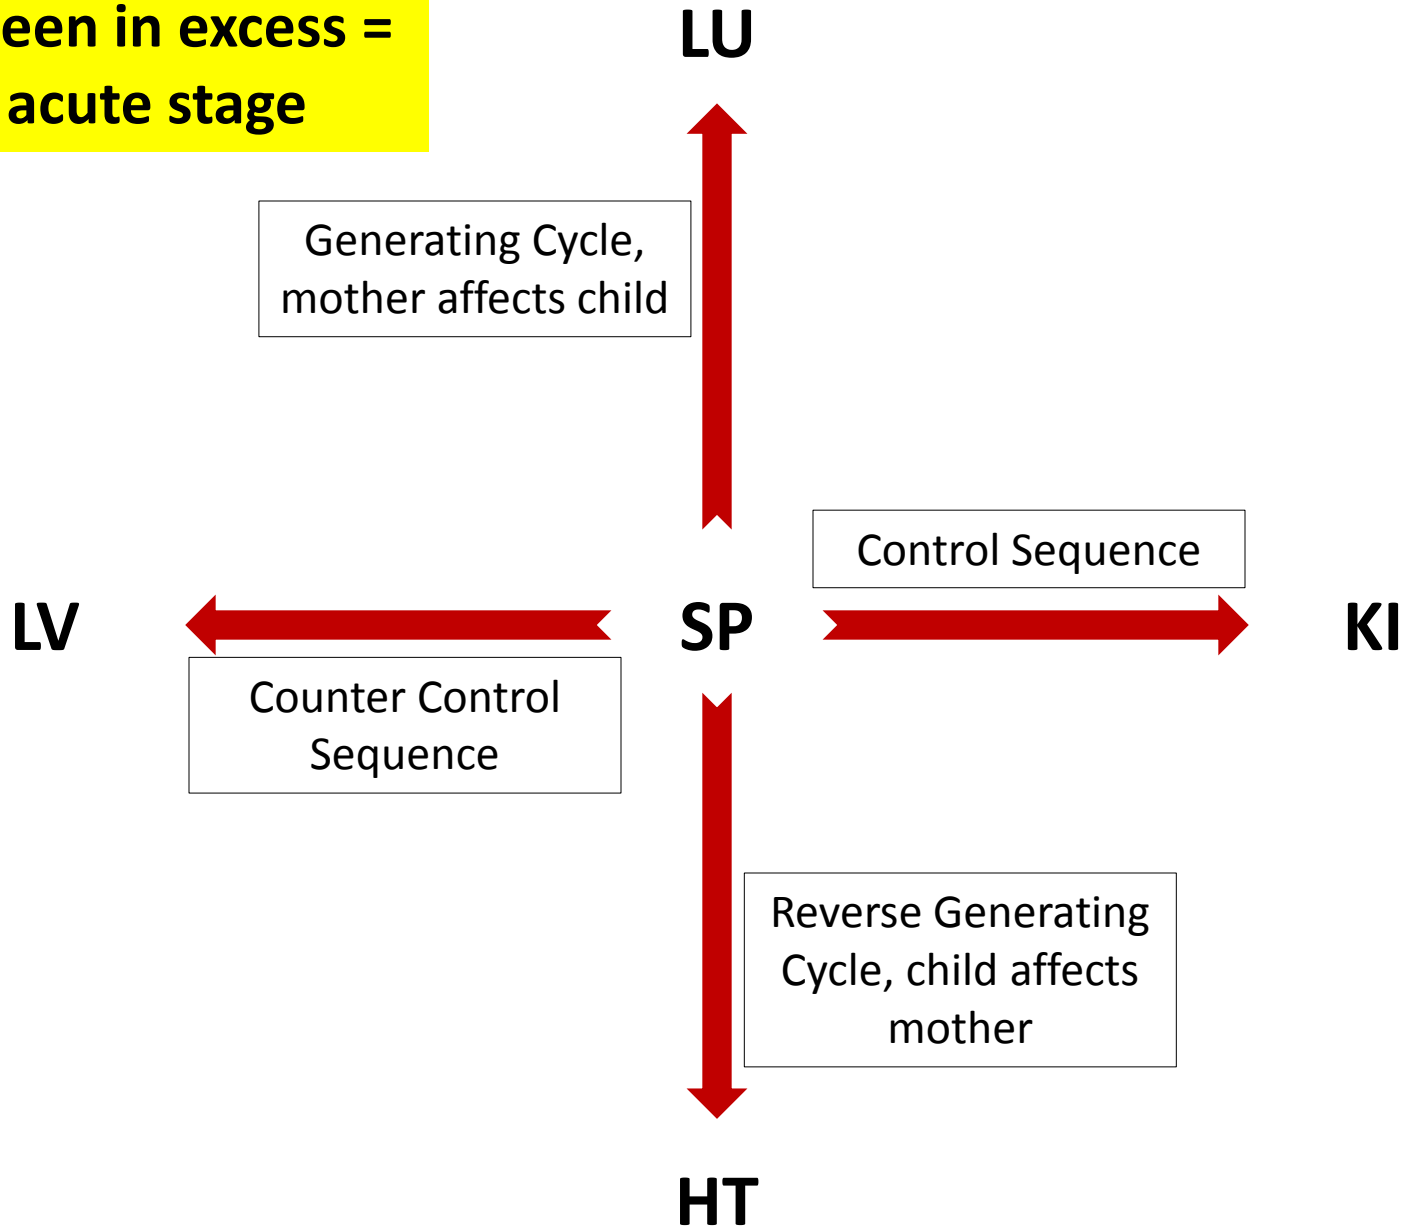

Liver in excess =
acute stage

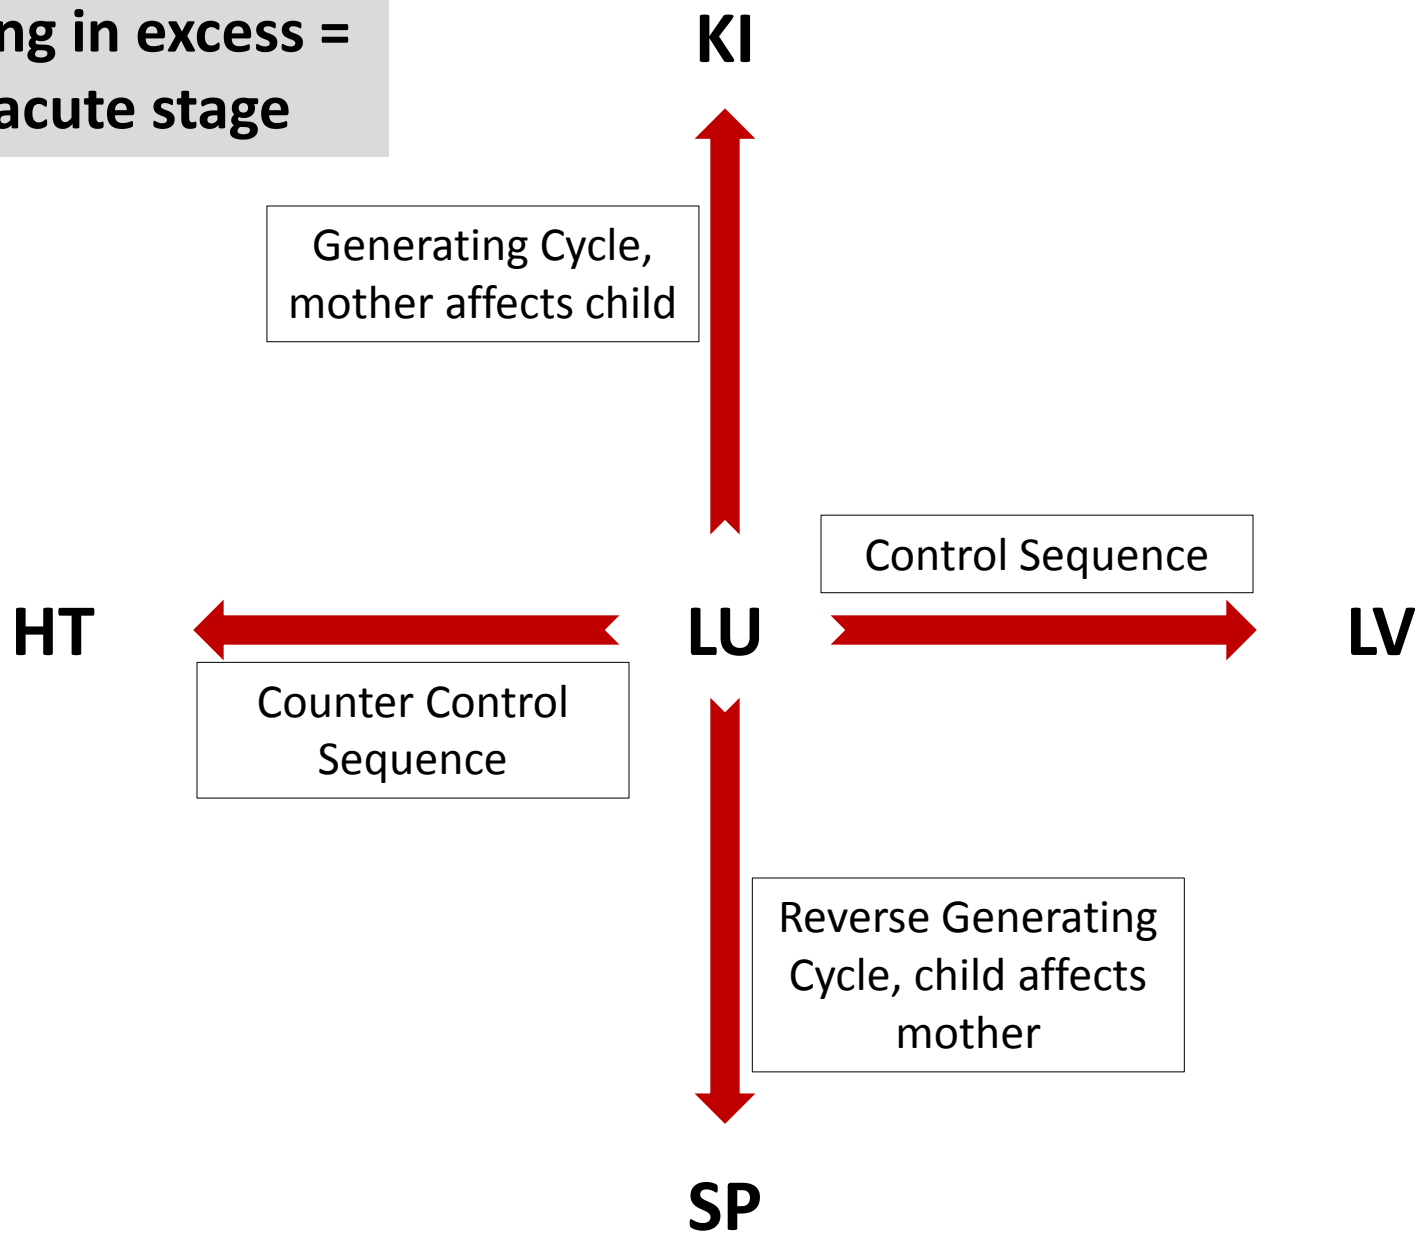

**Heart in excess =
acute stage**

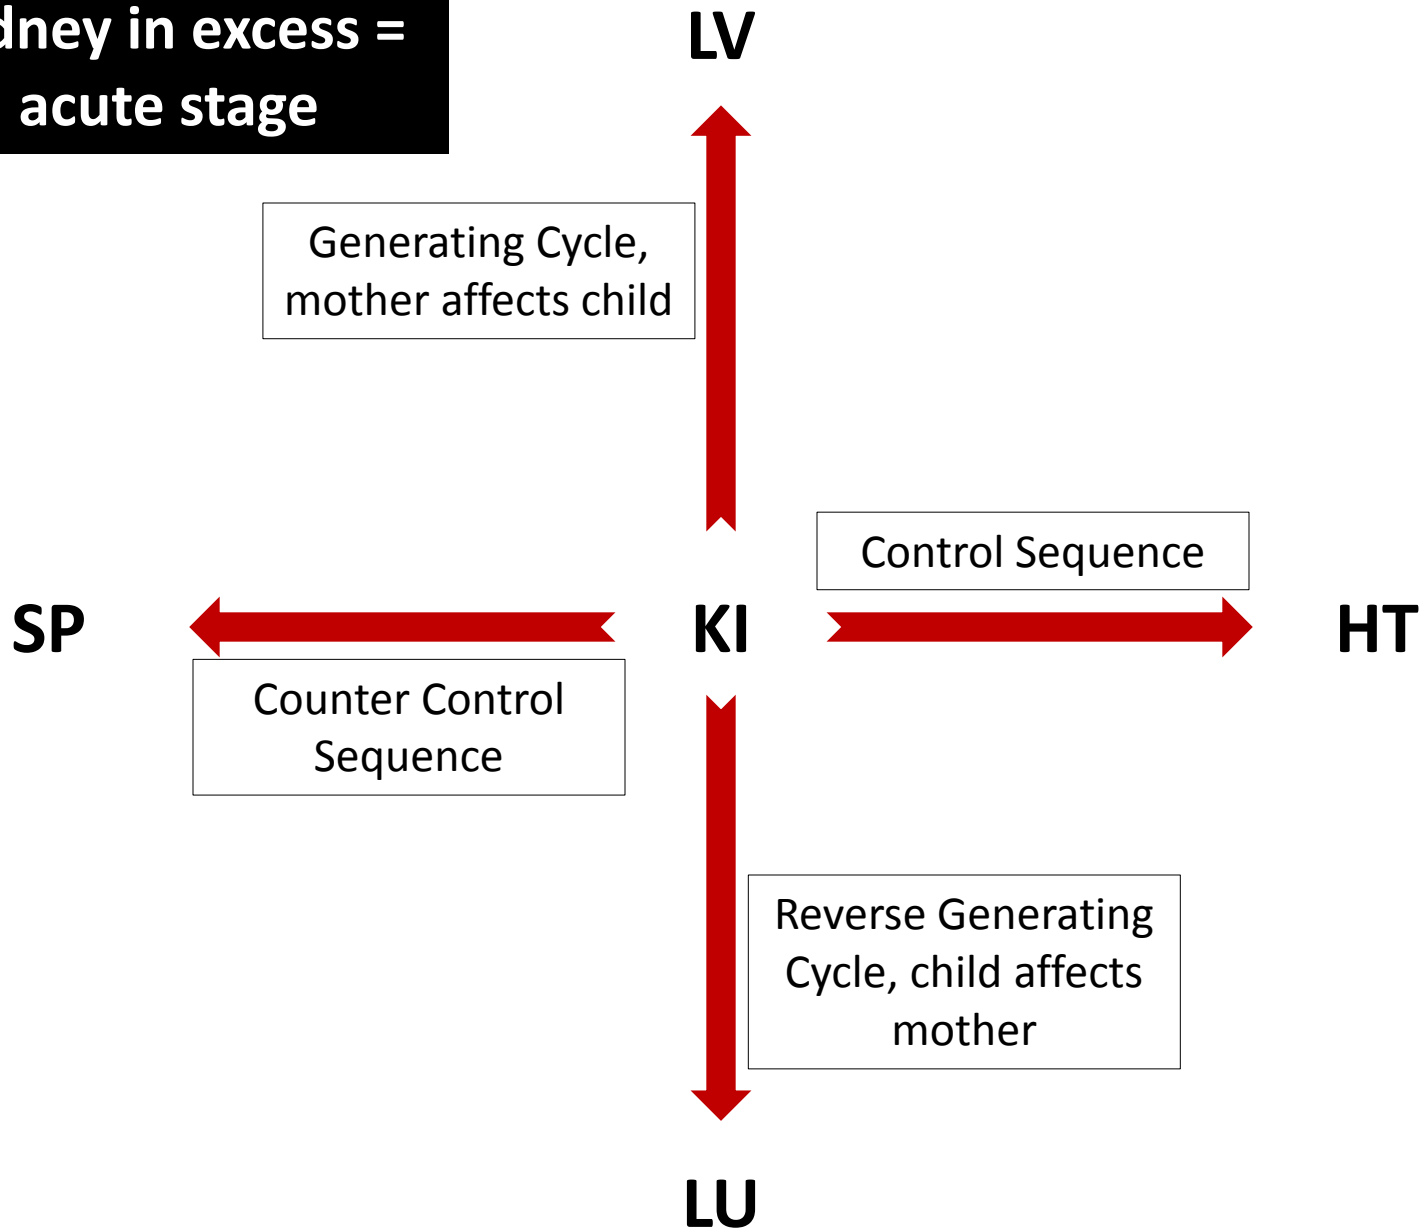

**Spleen in excess =
acute stage**

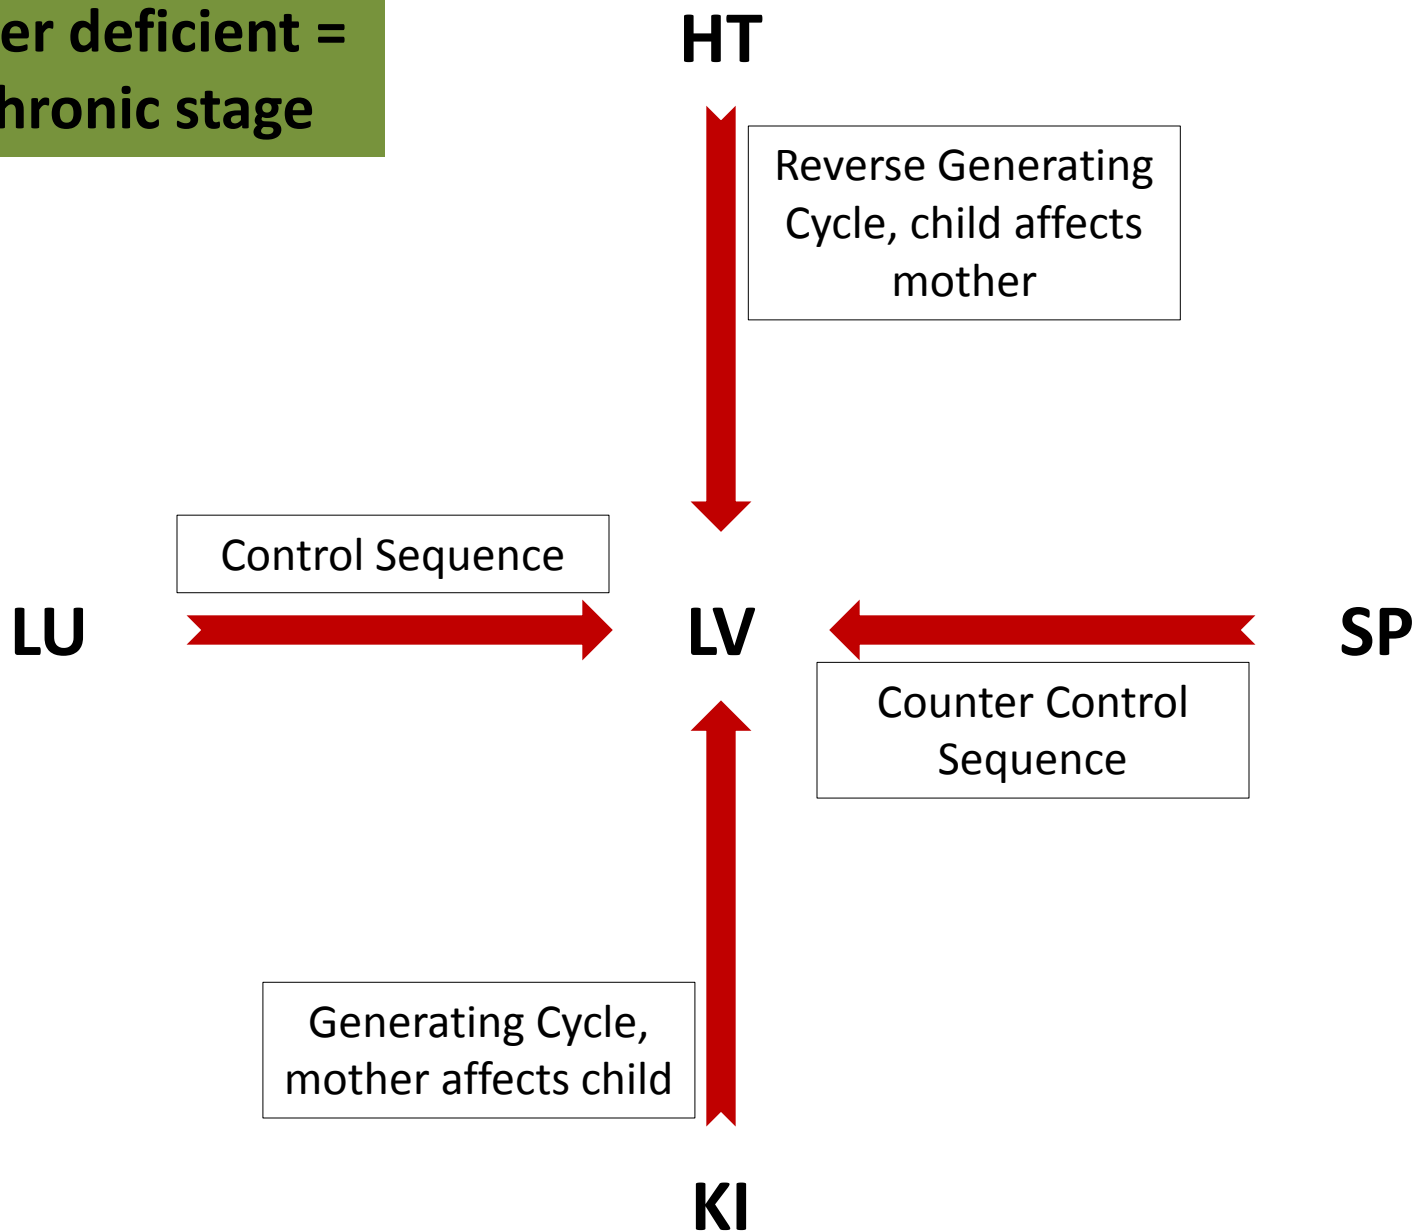

**Lung in excess =
acute stage**

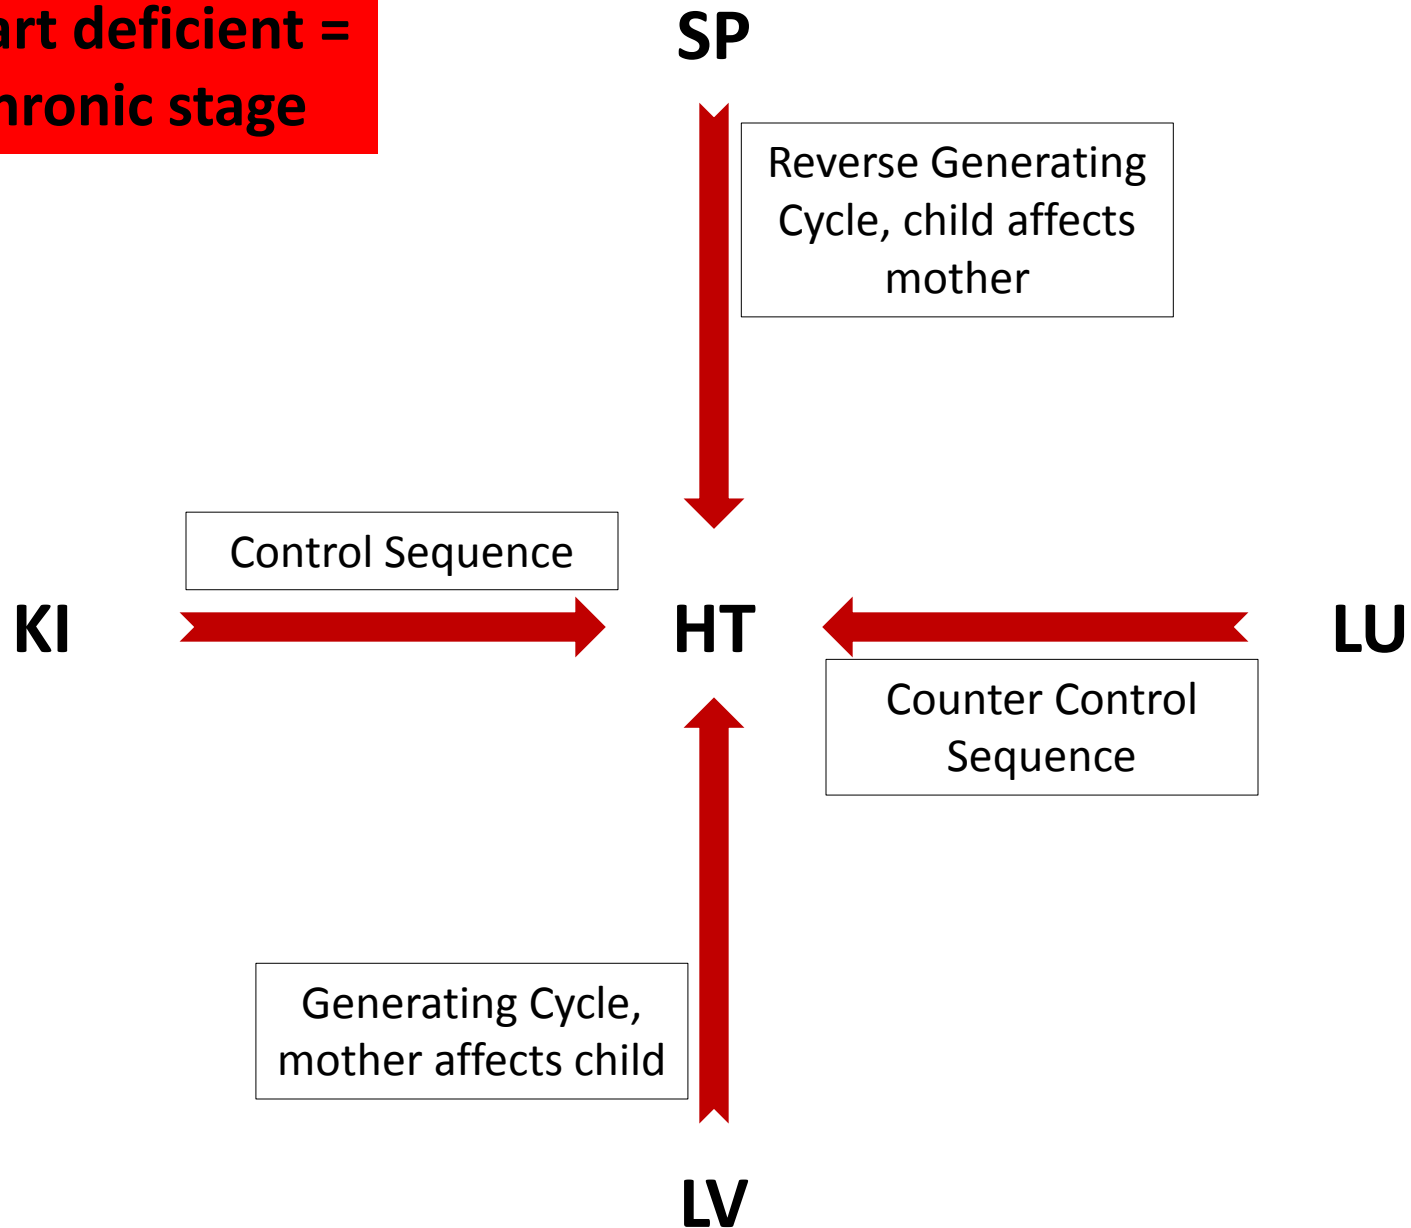

Kidney in excess = acute stage

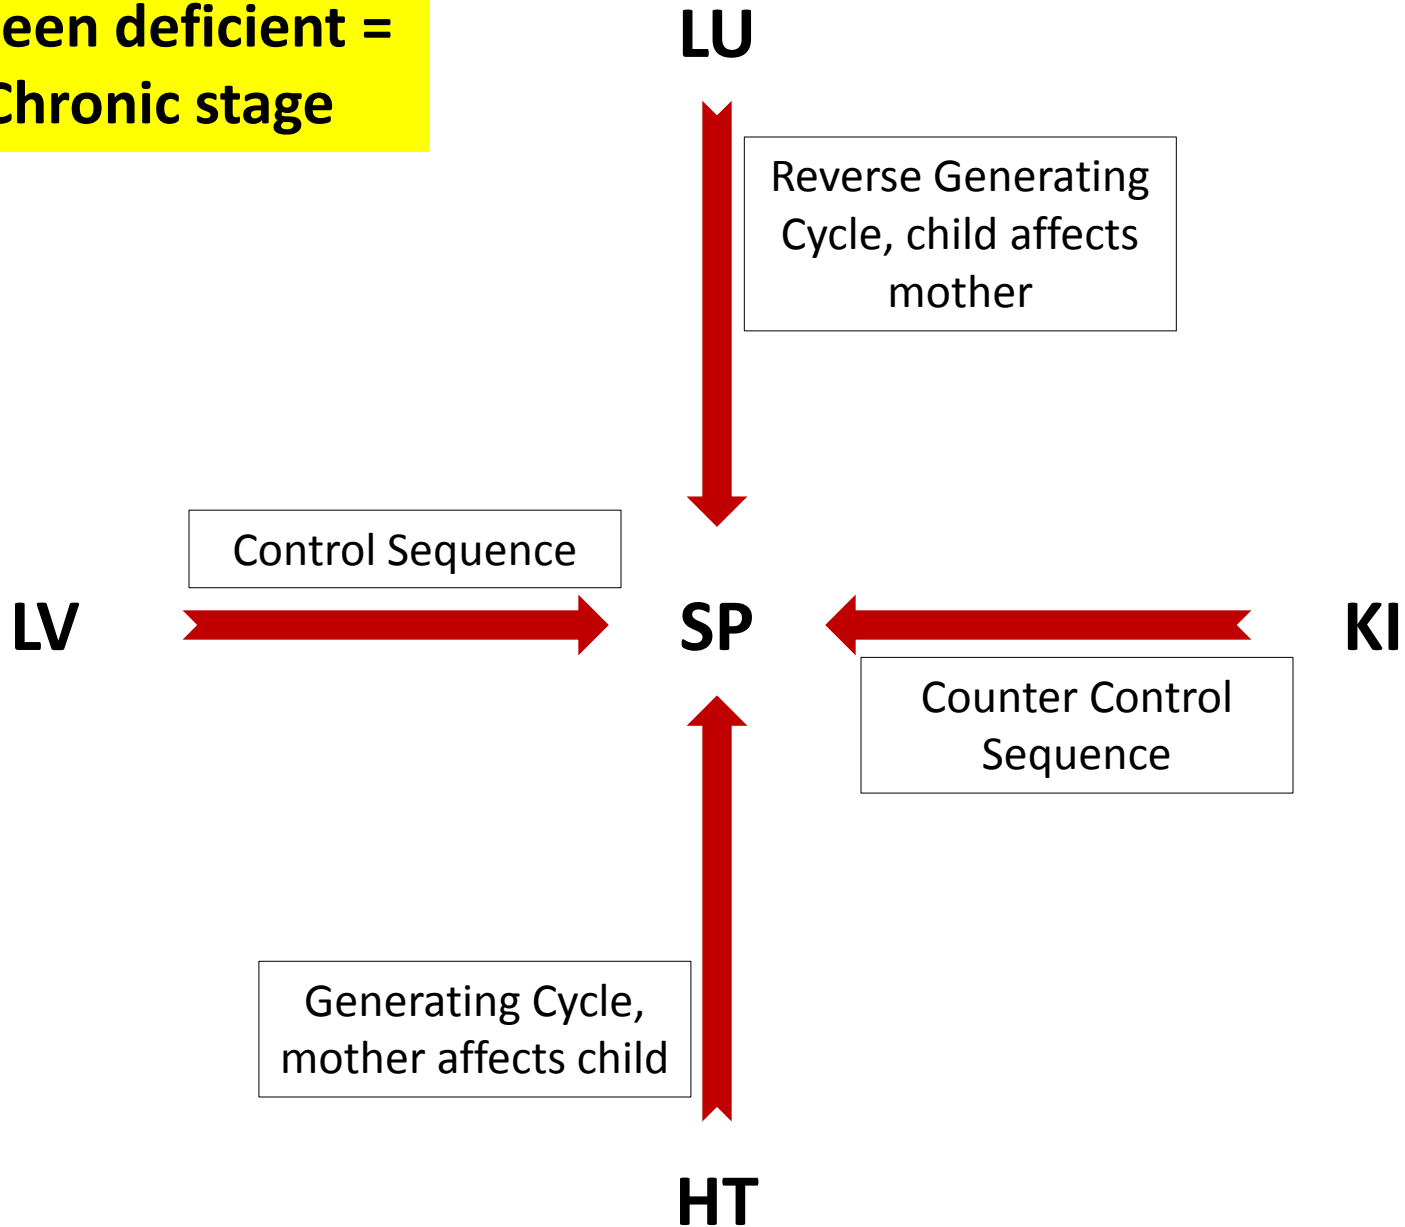

**Liver deficient =
Chronic stage**

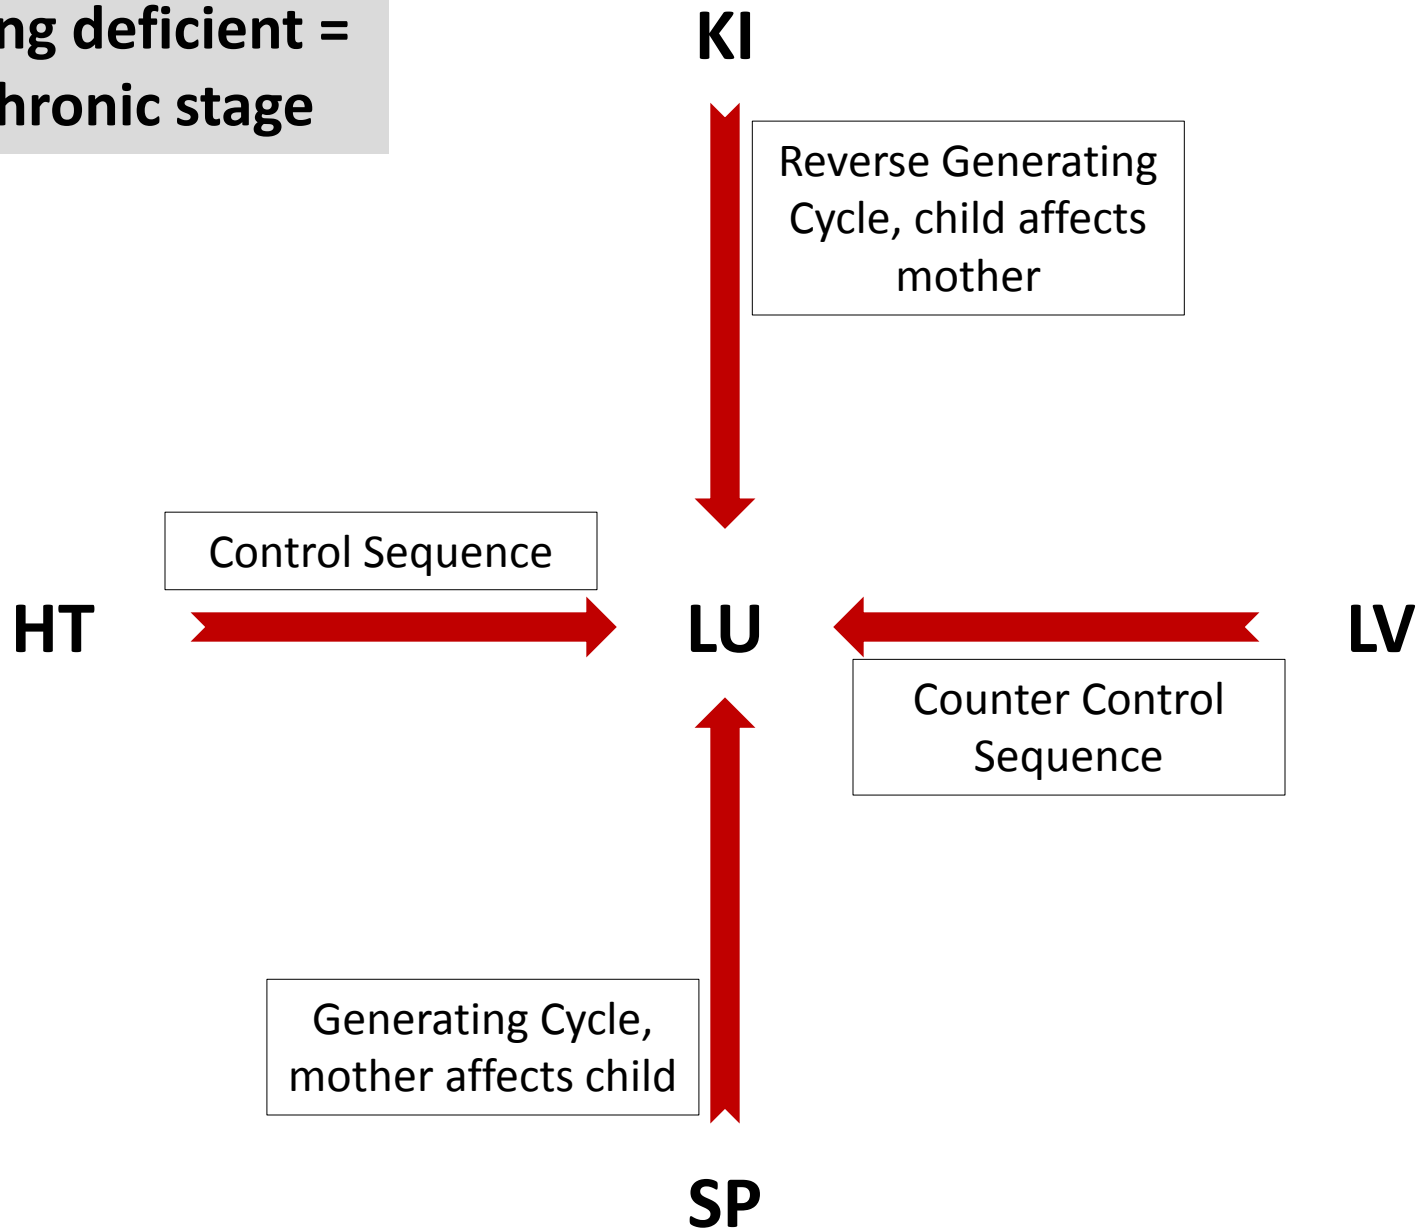

**Heart deficient =
Chronic stage**

**Spleen deficient =
Chronic stage**

Lung deficient =
chronic stage

**Kidney deficient =
chronic stage**
